

getAST

```
graph LR; A[getAST] --> B[CellExtractor::foundTargetCell]
```

A diagram showing a call from a function named 'getAST' to a method named 'CellExtractor::foundTargetCell'. The 'getAST' node is a gray rectangle on the left, and the 'CellExtractor::foundTargetCell' node is a white rectangle with a black border on the right. A blue arrow points from the right side of the 'getAST' node to the left side of the 'CellExtractor::foundTargetCell' node.

CellExtractor::foundTargetCell
