

```
exprtk::details::node  
_collector_interface  
< expression_node< T > >
```

```
exprtk::details::node  
_depth_base< expression  
_node< T > >
```

```
exprtk::details::expression  
_node< T >
```

The diagram illustrates the class hierarchy of ExprTk. A central class, `exprtk::details::expression_node< T >`, is shown in a grey box on the right. Two other classes, `exprtk::details::node_collector_interface< expression_node< T > >` and `exprtk::details::node_depth_base< expression_node< T > >`, are shown in white boxes on the left. Blue arrows point from the grey box to each of the white boxes, indicating that `expression_node` is the base class for both `node_collector_interface` and `node_depth_base`.
