

```
exprtk::details::for  
_loop_node::node_depth
```

```
graph LR; A["exprtk::details::for  
_loop_node::node_depth"] --> B["exprtk::details::node  
_depth_base< expression  
_node< T > >::compute_node_depth"]
```

A diagram illustrating a function call flow. On the left, a gray rectangular box contains the text `exprtk::details::for` and `_loop_node::node_depth`. A blue arrow points from this box to a white rectangular box on the right. The white box contains the text `exprtk::details::node`, `_depth_base< expression`, and `_node< T > >::compute_node_depth`.

```
exprtk::details::node  
_depth_base< expression  
_node< T > >::compute_node_depth
```
