exprtk::details::generic
_function_node::init_branches

exprtk::details::vec
_data_store::data

```
graph LR; A["exprtk::details::vec_data_store::dump"] --> C["exprtk::details::vec_data_store::data"]; B["exprtk::details::generic_function_node::init_branches"] --> C;
```

The diagram illustrates a dependency or data flow. Two source functions, 'exprtk::details::vec_data_store::dump' and 'exprtk::details::generic_function_node::init_branches', are shown on the left. Both have blue arrows pointing to a common target, 'exprtk::details::vec_data_store::data', which is highlighted in a gray box on the right.
