

exprtk::function_traits

exprtk::type_store
< T >::parameter_list

exprtk::igeneric_function< T >

rtrn_type

```
graph BT; A[exprtk::igeneric_function< T >] -- solid blue arrow --> B[exprtk::function_traits]; A -. dashed purple arrow labeled "rtrn_type" .-> C[exprtk::type_store< T >::parameter_list];
```

The diagram illustrates the relationships between three C++ types. At the bottom is a grey box containing `exprtk::igeneric_function< T >`. A solid blue arrow points from this box to a white box at the top left containing `exprtk::function_traits`. A dashed purple arrow points from the same bottom box to a white box at the top right containing `exprtk::type_store< T >::parameter_list`. The dashed arrow is labeled `rtrn_type`.
