

exprtk::parser::expression
_generator::const_optimise_switch

```
graph LR; A["exprtk::parser::expression  
_generator::const_optimise_switch"] --> B["exprtk::parser::error_node"]; A --> C["exprtk::details::is_true"];
```

The diagram illustrates a directed relationship from a source node to two target nodes. The source node, located on the left, is a gray rectangle with a black border containing the text 'exprtk::parser::expression' and '_generator::const_optimise_switch'. Two blue arrows originate from the right side of this node. The top arrow points to a white rectangle with a black border containing the text 'exprtk::parser::error_node'. The bottom arrow points to another white rectangle with a black border containing the text 'exprtk::details::is_true'.

exprtk::parser::error_node

exprtk::details::is_true
