```
graph LR; A["exprtk::details::numeric::details::nand_impl"] --> D["exprtk::details::numeric::details::is_false_impl"]; B["exprtk::details::numeric::details::nor_impl"] --> D; C["exprtk::details::numeric::details::xor_impl"] --> D;
```

The diagram illustrates a dependency or inheritance relationship. Three source functions on the left (nand_impl, nor_impl, and xor_impl) all point via blue arrows to a single target function on the right (is_false_impl). The target function is highlighted with a gray background, while the source functions have white backgrounds with black borders.
