```
graph LR; A["exprtk::details::numeric::details::and_impl"] --> D["exprtk::details::numeric::details::is_true_impl"]; B["exprtk::details::numeric::details::or_impl"] --> D; C["exprtk::details::numeric::details::xnor_impl"] --> D;
```

The diagram illustrates a dependency or inheritance relationship. Three source functions on the left (and_impl, or_impl, and xnor_impl) all point via blue arrows to a single target function on the right (is_true_impl). The target function is highlighted with a gray background, while the source functions are in white boxes with black borders.
