

exprtk::symbol_table
::operator=

exprtk::symbol_table
::~~symbol_table

exprtk::symbol_table
::control_block::destroy

```
graph LR; A["exprtk::symbol_table::operator="] --> C["exprtk::symbol_table::control_block::destroy"]; B["exprtk::symbol_table::~~symbol_table"] --> C;
```

The diagram illustrates a relationship between three functions. On the left, two white rectangular boxes with black borders contain the function signatures 'exprtk::symbol_table::operator=' and 'exprtk::symbol_table::~~symbol_table'. On the right, a gray rectangular box with a black border contains the function signature 'exprtk::symbol_table::control_block::destroy'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'operator=' and '~symbol_table' are associated with or point to the 'control_block::destroy' function.
