

exprtk::symbol_table
::remove_stringvar

exprtk::symbol_table
::remove_variable

exprtk::symbol_table
::type_store::remove

```
graph LR; A["exprtk::symbol_table::remove_stringvar"] --> C["exprtk::symbol_table::type_store::remove"]; B["exprtk::symbol_table::remove_variable"] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, two white rectangular boxes with black borders contain the function names 'exprtk::symbol_table::remove_stringvar' and 'exprtk::symbol_table::remove_variable'. On the right, a gray rectangular box with a black border contains the function name 'exprtk::symbol_table::type_store::remove'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'remove_stringvar' and 'remove_variable' are mapped to or implemented by 'type_store::remove'.
