

exprtk::results_context
::get_string

exprtk::rtl::vecops
::exprtk_final::operator()

exprtk::type_store
::type_view::begin

```
graph LR; A["exprtk::results_context::get_string"] --> C["exprtk::type_store::type_view::begin"]; B["exprtk::rtl::vecops::exprtk_final::operator()"] --> C;
```

The diagram illustrates a dependency or call relationship. Two source functions, 'exprtk::results_context::get_string' and 'exprtk::rtl::vecops::exprtk_final::operator()', are shown in white boxes on the left. Two blue arrows originate from these boxes and point to a single target function, 'exprtk::type_store::type_view::begin', which is shown in a gray box on the right.
